

UNEMPLOYMENT

Meaning: Unemployment refers to the state of being without a job despite actively seeking work, often measured by the unemployment rate in a given area.

1. Unemployment rates have surged in recent months due to the economic downturn.
2. The government implemented several programs aimed at reducing unemployment among young adults.
3. Many families are struggling as long-term unemployment continues to affect their livelihoods.
4. Workers are often caught in a cycle of unemployment that makes it difficult to regain stability.
5. Rising unemployment can lead to increased social unrest and calls for policy reform.
