

UNIDIMENSIONAL

Meaning: Unidimensional refers to something that has only one dimension or aspect, often implying a lack of depth or complexity.

1. The character development in the film felt unidimensional, lacking the depth that viewers typically expect.
2. In mathematics, a line is often described as unidimensional since it extends in only one direction.
3. Her argument was criticized for being unidimensional, failing to consider multiple perspectives on the issue.
4. The artist's style was unidimensional, focusing solely on form without exploring color or texture.
5. His approach to solving the problem was unidimensional, overlooking the complexities involved in the situation.
