

# UNSTRATIFIED

*Meaning: Unstratified refers to geological deposits or layers that lack distinct sedimentary layering or stratification, indicating a sudden or rapid accumulation of material.*

1. The geologist noted that the unstratified deposits indicated a sudden influx of sediment.
2. In the laboratory, the researchers observed unstratified layers in the sample, suggesting rapid deposition.
3. The artist's unstratified use of color created a vibrant and dynamic composition.
4. The unstratified nature of the data made it difficult to draw clear conclusions.
5. During the excavation, they discovered unstratified material that dated back to the early Holocene era.
