

VACCINATOR

Meaning: A vaccinator is a person who administers vaccines to individuals, typically in a clinical or public health setting.

1. The vaccinator administered the flu shots efficiently to all the children at the clinic.
2. After the training, every nurse became a certified vaccinator, ready to assist in the vaccination campaign.
3. In response to the pandemic, the government recruited thousands of vaccinators to speed up the immunization process.
4. The local health department organized a community event where each vaccinator provided vaccines free of charge.
5. Parents were relieved to see a professional vaccinator at the school, ensuring their children received their necessary vaccinations.
