

VACUOLATED

Meaning: Vacuolated refers to cells that contain vacuoles, which are membrane-bound compartments filled with fluid or other substances, often indicating a physiological response or condition such as water absorption.

1. The vacuolated cells in the tissue sample indicated a significant response to the experimental treatment.
2. Under the microscope, the vacuolated appearance of the plant cells suggested they were absorbing excess water.
3. Research showed that the vacuolated structure of the algae played a vital role in its buoyancy and nutrient storage.
4. During the examination, the pathologist noted that the vacuolated areas were a hallmark of the disease's progression.
5. The scientist was intrigued by how the vacuolated regions of the bacteria contributed to their survival in harsh environments.
