

VELELLA

Meaning: Velella is a genus of free-floating marine animals, also known as by-the-wind sailors, characterized by their translucent, sail-like structures and vibrant blue coloration.

1. The velella drifted gracefully along the surface of the ocean, its translucent body shimmering in the sunlight.
2. During our beachcombing adventure, we discovered a cluster of velella washed ashore, their vibrant blue colors captivating our attention.
3. Scientists study the velella to understand its unique adaptations for survival in the open ocean.
4. As we walked along the tide pools, we spotted a velella, its delicate sail catching the breeze.
5. The velella is often mistaken for a jellyfish, but it is actually a colonial organism composed of many individual polyps.
