

VENTRICULAR

Meaning: Ventricular refers to anything related to the ventricles, which are the lower chambers of the heart responsible for pumping blood.

1. The ventricular walls contract to pump blood out of the heart.
2. Abnormalities in the ventricular structure can lead to serious health issues.
3. Doctors monitored the patient's ventricular function during the stress test.
4. A ventricular arrhythmia can cause the heart to beat irregularly.
5. Treatment often involves medications to stabilize ventricular activity.
