

# VINASSE

*Meaning: Vinasse is a byproduct of the distillation of sugarcane or beet, rich in organic matter, commonly used as a fertilizer in agriculture.*

1. Vinasse is often used as a fertilizer due to its high organic content.
2. The distillation process produces vinasse, which can be utilized in various agricultural applications.
3. Farmers increasingly turn to vinasse as a sustainable alternative to chemical fertilizers.
4. After producing rum, the leftover vinasse can be repurposed for biogas production.
5. Research indicates that vinasse can improve soil quality and enhance crop yields.
