

VIVIPARA

Meaning: Vivipara refers to organisms that reproduce by giving birth to live offspring instead of laying eggs.

1. Vivipara refers to species that give birth to live young rather than laying eggs.
2. The vivipara reproductive strategy is seen in many species of mammals, including humans.
3. In some cases, vivipara organisms provide nutrients to the developing embryos through a placenta.
4. The concept of vivipara contrasts sharply with oviparous species, which lay eggs.
5. Researchers are studying vivipara adaptations in various environments to understand their evolutionary advantages.
