

VIVIPAROUSLY

Meaning: Viviparously: in a manner of reproduction where the young develop inside the body of the parent, resulting in live birth.

1. Many species of mammals reproduce viviparously, allowing their young to develop inside their bodies.
2. The viviparous nature of certain reptiles challenges traditional views of reptilian reproduction.
3. In the animal kingdom, viviparously birthing species often provide greater survival rates for their offspring.
4. Some fish are known to give birth viviparously, which is a unique adaptation within their aquatic environments.
5. Studying how various organisms reproduce viviparously can reveal important insights into evolutionary biology.
