

WADER

Meaning: A wader is a type of bird, typically with long legs and a slender body, that is adapted for feeding in shallow water or on mudflats.

1. The wader stood still in the shallow water, scanning the shoreline for its next meal.
2. With its long legs and slender body, the wader gracefully moved along the beach at low tide.
3. Birdwatchers flocked to the marshlands to observe the rare wader that had been spotted there.
4. As the sun set, the silhouette of the wader against the golden horizon created a breathtaking scene.
5. The conservation team worked tirelessly to protect the habitat of the endangered wader species.
