

WARPAGE

Meaning: Warpage refers to the distortion or bending of a material, often due to changes in temperature or humidity, that affects its shape and stability.

1. The warpage of the wooden table made it difficult to keep items balanced on its surface.
2. Engineers must account for warpage in materials when designing structures to ensure safety and durability.
3. After the intense heat exposure, the plastic showed significant warpage, compromising its integrity.
4. To prevent warpage in the final product, the manufacturer implemented a strict temperature control process.
5. The artist embraced the natural warpage of the canvas, incorporating it into her unique painting style.
