WEGOTISM

Meaning: Wegotism is the tendency to dominate conversations by focusing excessively on one's own experiences and feelings, often at the expense of others' contributions.

1. Wegotism often manifests in conversations where individuals continuously steer the dialogue back to their own experiences.

2. In a group discussion, her wegotism made it difficult for anyone else to share their opinions or stories.

3. The teacher encouraged students to listen actively rather than indulge in wegotism during their presentations.

4. His wegotism was evident when he interrupted others to highlight his achievements repeatedly.

5. To build a more inclusive environment, we must challenge our tendencies toward wegotism in social settings.
