

WINDMILL

Meaning: A windmill is a structure that converts wind energy into mechanical power, typically featuring blades or sails that rotate to generate movement.

1. The old windmill stood silently in the field, its blades creaking in the gentle breeze.
2. As the sun set, the silhouette of the windmill became a picturesque part of the landscape.
3. Visitors flocked to the historic windmill to learn about its role in sustainable energy.
4. Children laughed as they ran around the base of the windmill, their imaginations soaring like its sails.
5. With a strong gust of wind, the windmill's sails spun rapidly, showcasing its impressive engineering.
